My dear Mr. Weisberg:

Another anniversary is upon us-the tragic, untimely death of a President on Nov 22, 1963! Yes, I hold you in high regards and respect sir.

May I say thanks again for your letter reply and autograph some time ago? I know your a busy man so, I will keep this brief. My deep interest in this assassination is, of course, very minute compared to the years you have devoted but, it seems almost like a lifetime since starting about three years ago. I work full time and squeeze in some reading of your fine books and others before I sleep during the day (I work the night shift) and try to again read inbetween normal family activities, in the evenings before going back into work! Our local paper did a story on my interest in the JFK murder and its quite possible another paper will be interviewing me again. Possibly this week? Everyone at the shop knows about my study on this so many come up to me and tell me of paper articles, television upcoming shows, and library's and the bookstore keeps me on my toes!

But, enough rubbish on what I do! The reason I write today is to inquire about what you think of these new, updated, latest books coming out? Do you feel they are headed in the right, truthful direction? Books like Contract on America, Crossfire:, High Treason, and I just got tonite the updated Summers book Conspiracy- sir, what is your thoughts on these?

Thanks very, very much for your time and patience in reading this and rest assured that to people all over like myself included sure think your a super guy! I think often of your name and books and devotion, this I will never forget all my days. Best wishes and may you also be in best of health.

Your Respectful
Reader and follower,
Karl D. Salisbury
